 KEEPS A GENERAL ASSORTMENT
 OF GOODS.
 Everything the Farmer wants or needs can
 be found in his store.
 Go and examine goods and prices.

The mines of Leadville yield nine hundred tons of ore per day.

Monday week, says the Larned Chronoscope, the air was full of chintz bags, apparently flying south. We hope they will continue to fly until they leave this continent.

The grasshoppers passed over Great Bend two weeks ago in great numbers, says the Democrat. There are but few instances where they alighted, and even where they did, no damage was done.

An item is going the rounds giving some peculiar names of persons. The Sterling Bulletin adds the names of Mr. A. Turnipseed, of N. Ohio Falls, and Miss Letherbelly, of Ponca.

The Larned Chronoscope has been shown a stalk of millet, a cross between the German and common varieties, which measured seven feet. It was grown on the farm of M. Foster Whitney, and he estimates the total yield on the piece of about one and one-half acres at five tons.

Prairie fires are liable to occur, and the Chronoscope gives this timely warning: When will our people profit by the evil results that follow in the wake of prairie fires. Too much cannot be said on this subject, and an example should be made of some one. Do not let a false sympathy prevent the condign punishment that should fall upon those who wantonly bring this dire evil upon a community.

The Sterling Bulletin says Wm. Estes, of Coopersburg, put in two acres of potatoes of the Early Rose variety, one acre of which he mulched and the other not. On the acre which is mulched, he has a splendid crop; much superior to that which was not, and better than any other in that town-ship. Perhaps this practice would lead to a more extensive and profitable cultivation of potatoes, if generally followed.

Hay for fuel attracts more attention. The Larned Chronoscope says: We notice that nearly all the mills east of us in the Valley, are altering their boilers so as to burn hay instead of coal, and wherever it has been tried, they report a large saving. If this is true, it seems to us that our mill ought to make the change also. Through the sand hills we have an endless quantity of grass that might be used in this way, which is of very little value for hay; but is a very woodiness which renders it valueless for feeding, would make it all the better for fuel.

GREEN'S AUGUST FLOWER.
 It is natural for people suffering with Dyspepsia and Liver Complaint or any derangement of the digestive organs, such as Sour Stomach, Sick Headache, Habitual Constipation, Palpitation of the Heart, Heart burn, Water-brash, gnawing and burning pains at the pit of the Stomach, Yellow Skin, Coated tongue, and disagreeable taste in the mouth, coming up of food after eating, low spirits, &c., to put off from day to day buying an article that they know has cured their neighbor, friend or relative, yet they have no faith in it until it is too late. But if you will go to your druggist and get a bottle of Green's August Flower your immediate cure is as certain as you live. Sample bottles of this medicine can be obtained for 10 cents to try its superior virtue. Regular size 75 cents. Try it, two doses will relieve any case.

A MOTHER'S GRIEF.
 The pride of a mother, the life and joy of a home, are her children, hence her grief when sickness enters and takes them away. Take warning then, that you are running a terrible risk, if they have a Cough, Croup or Whooping Cough, which lead to Consumption if you do not attend to it at once. **SHILOH'S CONSUMPTION CURE** is guaranteed to cure them. Price 10 cents, 50 cts and \$1.00. For lame back, side or chest, use Shiloh's Porous Plaster. Price 25 cents. Sold by H. J. Fringer, Druggist.

THE BEST I EVER KNEW OF.
 J. G. Starkey, a prominent and influential citizen of Iowa City, says: "I have had the Dyspepsia and Liver Complaint for several years, and have used every remedy I could hear of, without any relief whatever, until I saw your Shiloh's Vitalizer advertised in our paper, and was persuaded to try it. I am happy to state that it has entirely cured me. It is certainly the best remedy I ever knew of." Price 75 cts. Sold by H. J. Fringer, Druggist.

SHILOH'S CATARRH REMEDY. A marvelous cure for Catarrh, Diphtheria, Canker mouth, and Headache. With each bottle there is an ingenious nasal injector for the more successful treatment of the complaint, without extra charge. Price 50 cts. Sold by H. J. Fringer, Druggist, Dodge City, Kas.

Quinine and Arsenic
 Form the basis of many of the Ague remedies in the market, and are the last resort of Physicians and people who know no better medicine to employ for this distressing complaint. The effects of either of these drugs are destructive to the system producing headache, intestinal disorders, vertigo, dizziness, ringing of the ears and depression of the constitutional health. **AYER'S AGUE CURE** is a vegetable discovery, containing neither quinine, arsenic, nor any deleterious ingredient, and is an infallible and rapid cure for every form of Fever and Ague. Its effects are permanent and certain, and no injury can result from its use. Besides being a positive cure for Fever and Ague in all of its forms, it is also a superior remedy for Liver Complaints. It is an excellent tonic and preventive, as well as a cure, of all complaints peculiar to malarious, marshy and miasmatic districts. It acts directly on the Liver and biliary apparatus, thus stimulating the system to a vigorous, healthy condition. For sale by H. J. Fringer.

POST OFFICE HOURS:
 From 7 A. M. to 9 P. M. Money Orders issued from 9 A. M. to 6 P. M. Sundays excepted.
H. J. FRINGER, P. M.

A WONDERFUL DISCOVERY.
 An Article that Will Make the Bald and the Gray Headed Rejoice.

Of all the compounds which the chemist's art has given to the world, for hundreds of years, for the purpose of restoring the hair to its natural growth and color, not one has been perfect. Many of the hair dressings of the day are excellent, but the great mass of the stuffs sold for promoting the growth and bringing back the original color are mere humbugs, while not a few are positively pernicious in their effects upon the scalp and the structure of the hair. All hair dyes are well known to chemists as more or less poisonous, because the change in color is artificial, and does not depend upon a restoration of the functions of the scalp to their natural health and vigor. The falling out of the hair, the accumulations of dandruff, and the premature change in color, are all evidences of a diseased condition of the scalp and the glands which nourish the hair. To arrest these causes the article used must possess medical as well as chemical virtues, and the change must begin under the scalp to be of permanent and lasting benefit. Such an article has been discovered, and like many other wonderful discoveries it is found to consist of elements almost in their natural state. Petroleum oil is the article which is made to work such extraordinary results; but it is after the best refined article has been chemically treated, and completely deodorized, that it is in proper condition for the toilet. It was in far-off Russia that the effects of petroleum upon the hair were first observed; a Government officer having noticed that a partially bald headed servant of his, when trimming the lamps, had a habit of wiping his oil-be-smeared hands in his scanty locks, and the result was, in a few months, a much finer head of black, glossy hair, than he ever had before. The oil was tried on horses and cattle that had lost their hair from the cattle plague, and the results were as rapid as they were marvelous. The manes and even the tails of horses which had fallen out were completely restored in a few weeks. These experiments were heralded to the world, but the knowledge was practically useless to the prematurely bald and gray, as no one in civilized society could tolerate the use of refined petroleum as a dressing for the hair. But the skill of one of our chemists has overcome the difficulty, and, by a process known only to himself, he has, after very elaborate and costly experiments, succeeded in deodorizing refined petroleum, which renders it susceptible of being handled as daintily as the famous *eau de cologne*. The experiments with the deodorized liquid on the human hair were attended with the most astonishing results. A few applications, where the hair was thin and falling, gave remarkable tone and vigor to the scalp and the hair, and the natural color began to appear almost from the first application. Every particle of dandruff disappears on the first or second dressing, and the liquid, so searching in its nature, seems to penetrate to the roots at once, and set up a radical change from the start. It is well known that the most beautiful colors are made from petroleum, and by some mysterious operation of nature the use of this article gradually imparts a beautiful light brown color to the hair, which, by continued use, deepens to a black. The color remains permanent for an indefinite length of time, and the change is so gradual that the most intimate friends can scarcely detect its progress. In a word, it is the most wonderful discovery of the age, and well calculated to make the prematurely bald and gray rejoice. The name *Carboline* has been given to the article, and is put up in a neat and attractive manner, and sold by all dealers in drugs and medicines. Price One Dollar a bottle.

Keeney & Co., Pittsburg, Pa., General Agents for the United States and Canada.
 We advise our readers to give it a trial feeling satisfied that one application will convince them of its wonderful effects.
